

TSMC's Arizona Bet Is About Leverage, Not Supply Security

May 31, 2026

The first wafer rolled out of TSMC's Phoenix fab in April 2024.

The core argument

TSMC spent \$40 billion building in Arizona. Most coverage treats this as a supply chain story.

Supporting evidence

Intel's 18A node is two years behind schedule. That matters here.

Closing

The companies that understand this will price their foundry relationships differently in 2026.
